COVID Update

Dear Residents, Tenants, and Families,

The last COVID update was on April 1, 2021. Since April 1st, we have had two staff that were in quarantine due to a high risk exposure in the community. Other than this, we've been COVID free at both St. John's locations.

We are seeing about 30 to 40 visitors per day at the two St. John's nursing homes. It's wonderful to see visitors in our buildings again! One of the most difficult state and federal guidelines to follow was the visitor restrictions.

We were hoping to be able to sponsor some type of Mother's Day gathering at St. John's, but unfortunately large group gatherings are not allowed yet in our environment. I don't anticipate these restrictions being lifted until more people in the general population are vaccinated.

If you haven't been vaccinated yet, please consider getting vaccinated. The vaccine is now widely available throughout Minnesota. If you have family members that haven't been vaccinated, please encourage them to get vaccinated. The vaccine is our ticket to getting life back to normal.

God Bless,

Scot Spates
